

We Claim:

1. A recyclable, one-time use, print on demand, digital camera comprising:  
a chassis comprising:-  
an image sensor device for sensing an image;  
5 a processing means for processing said sensed image;  
a pagewidth print head for printing said sensed image;  
an ink supply means for supplying ink to the print head;  
a supply of print media on to which said sensed image is printed; and  
a casing surrounding and encasing said chassis so that the ink supply  
10 means is unable to be accessed without destruction of the casing.
2. The camera of claim 1 in which the casing comprises two shells, the shells being  
bonded together during one of a manufacturing process and a recycling process.
- 15 3. The camera of claim 1 in which the casing is of a recyclable material.
4. The camera of claim 1 in the ink supply means comprises an ink supply  
cartridge which defines a plurality of ink supply channels, each of which is in  
communication with the print head and each channel containing a different color ink, in  
20 use, for enabling full color printing to be effected.
5. The camera of claim 4 in which the ink supply cartridge includes an inlet  
opening in communication with each channel via which said channel is refilled during  
recycling of the camera.
- 25 6. The camera of claim 4 in which each channel has a vent associated therewith,  
the vent being open during a refilling operation of the channel to allow egress of air  
from the channel and the vent being sealed after the refilling operation.
- 30 7. The area of claim 6 in which the seal is a replaceable seal to be removed during  
the refilling operation and replaced by a new seal after completion of the refilling  
operation.
